Delivering smarter and more sustainable supply chains

A Zero Waste World

“ Zero Waste World is a new working collaboration for leading companies committed to creating smarter and more sustainable supply chains. ”

Graham Chipchase, Brambles CEO

1. Eliminating waste

91%

Of world's plastic packaging isn't recycled

30%

Of world's food is wasted each year, but every \$1 invested in food waste policies brings \$14 in return

91%

Tonnes of paper and cardboard packaging were wasted in the EU alone between 2006 and 2015

2. Cutting out inefficiency

6%

Enhanced supply chain visibility can increase the level of demand-fulfilment by 4% to 6%

79%

Of companies with high performing supply chains achieve greater growth than their industry average

20%

Outpace by companies with integrated supply chains

3. Eradicating empty transport miles

78%

Of retailers see reducing road miles as a significant opportunity

20%

Of kilometres run by trucks in Europe are empty

120,000

The equivalent of 120,000 trips to the Moon

We all need to share more

CHEP

A Brambles Company

People want more

Europe's supply chains face their greatest challenges in living memory:

More online deliveries

More goods being transported

Consumer behaviour is changing rapidly

Increasing urbanization

The world needs less

Government and Society want a reduction in NO_x and CO₂

Estimated 25% of all Greenhouse Gas (GHG) emissions are generated by the Road Freight Sector

Trend to more frequent but smaller deliveries

UK currently 55,000 drivers short

Brexit 60,000 EU drivers in UK these drivers are now looking at alternative options

Average UK driver age 53 projected 250,000 to retire in next 20 Years Over 50s represent 47% of all drivers

Low margins

Logistics staff turnover 26% against a UK average 15%

Only 2% of employed drivers are under 25 compared to 12% of total employed population

Our Challenge

Department
for Transport

Total amount of goods lifted in the twelve months period ending June 2018 by GB-registered HGVs operating in the UK

1.39

Billion tonnes
of goods lifted

150

Billion tonne km
of goods moved

18.8

Billion km
travelled

CHEP

An E2E opportunity Double Stacking

- + 30% more product per truck
- + 30% lower transport cost
- + 30% fewer trucks

Applicability:

- + Weighing out (20%)
- + Order sizes (30%)

The other 50%

- Why not already?

- + Product damage
- + Retail acceptance
- + Just not the standard...

**It is already the standard in
Sweden & Finland**

The voice of the customer

“ We need to collaborate to obtain efficiencies. ”

“ We need to have a trusted partner to enable collaboration. ”

“ We need to start collaboration in a quick and easy way, identifying the size of the price. ”

Logistics collaboration has been talked about for years as being the key to unlocking many of the problems in our supply chains. Yet hardly anyone is doing it. Because the complexities involved in aligning logistical flows make even exploring collaboration incredibly difficult and expensive.

Is it truly possible for us to establish collaborative relationships with both customers and suppliers?

Here's what we need...

-  Shared understanding
-  Trust
-  Mutual benefit
-  Risk sharing

These are some of the benefits we could share in...

Reducing environmental impact

Financial savings

Cost avoidance

Continuity of Supply

Improved service levels

CHEP

A Brambles Company

This could result in...

More resilient supply chain
Competitive advantage

So....

Given benefits of collaboration why is it so hard to implement.
What can we do to implement at pace.

Thank you.
